The History of Dojo

(cliffnotes version)

Alex Russell

“netwindows”

A Foundation.

A Team.

dojo.workers()

Dylan Schiemann

Co-founder
SitePen, Inc.

location: Gilbert, AZ

website: <http://dylanschiemann.com/>

aliases: "dylan" "dylanks"

What is Dojo?

- A JavaScript Toolkit
 - Light-weight Base (6k - 26k)
 - ~30k in 1.4 (plugd)
 - Use at will Library

I LEARNED IT LAST NIGHT! EVERYTHING IS SO SIMPLE!
HELLO WORLD IS JUST
print "Hello, world!"

I DUNNO...
DYNAMIC TYPING?
WHITESPACE?

COME JOIN US!
PROGRAMMING
IS FUN AGAIN!
IT'S A WHOLE
NEW WORLD
UP HERE!

BUT HOW ARE
YOU FLYING?

I JUST TYPED
import antigavity

THAT'S IT?

... I ALSO SAMPLED
EVERYTHING IN THE
MEDICINE CABINET
FOR COMPARISON.

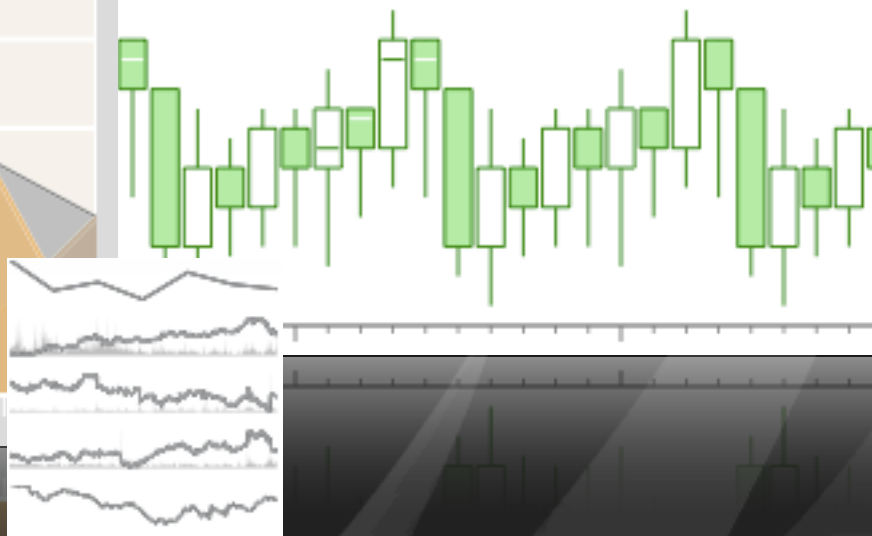

BUT I THINK THIS
IS THE PYTHON.

blut "Hello" world!
HELLO WORLD IS JUST

YOU FLYING?
BUT HOW ARE

IS THE PYTHON?
BUT I THINK THIS

Charts?

Charts?

`dojo.require("dojox.charting")`

Calendars?

Calendars?

```
dojo.require("dijit.form.DateTextBox")
```

File Uploads?

File Uploads?

```
dojo.require("dojox.form.FileUpload")
```

Syntax Highlighting?

Syntax Highlighting?

```
dojo.require("dojox.highlight")
```

... On and On

... On and On

It adds up.

Dojo Build System

All-in-One

- Works transparently with Package System
- Group modules into 'layers'
- Concatenate CSS @import into 'layers'
- Layer & File minification
 - Comments, Whitespace, newlines ...
- stripConsole (console.warn, .log, .error)

Firebug Lite

Package / Module Loading

- `dojo.require("some.module")`
- `dojo.addOnLoad(function(){ ... })`
- `dojo.registerModulePath("my", "../..my/")`
- `dojo.require("my.code")`
- `dojo.provide("my.code")`

#ifdef in JavaScript?

// the code:

```
//>>excludeStart("something", kwArgs.condition == true);  
/* code to exclude */  
//>>excludeStop("something");
```

exclude it:

```
./build.sh condition=true profile=myprofile
```

Special Builds

- Stubs (6k dojo.js)
- Base++ (dojo.js with modules)
- Cross-Domain
- plugd
- Scope Burning

MooJo?

scopeMap + kwArgs

```
// Dojo?  
Moo.load(function(){  
    place("<p>Hello, Moojo</p>", "container");  
    query("p")  
        .style("fontSize", "10px")  
        .animate({  
            fontSize:{ end: 42 }  
        })  
    ;  
});
```

```
//>>excludeStart("auto", kwargs.autoConflict == "on")
if(dojo.config.conflict){
//>>excludeStop("auto")

    // exportNS is a plugin
    dojo.exportNS(dojo, dojo.global);

//>>excludeStart("auto", kwargs.autoConflict == "on")
}
//>>excludeStop("auto")
```

start tests

stop tests

basic task test for frameworks.

This is not SlickSpeed, though uses the same framework.
Tests are run against a local copy of [this document](#). They add, remove, append, connect and otherwise mangle the DOM as defined by the [sample-tests.js](#) file.
These results are [optionally] reported back. There are [Charts being generated from this data](#)

TaskSpeed

- Written by Authors
- Fair before Right
- An interesting start
- Charts Available*

* <http://dante.dojotoolkit.org/taskspeed/report/charts.html>

It's JUST JavaScript

Plain JavaScript

- JavaScript should have:
 - `dojo.indexOf` / `forEach` / `map` / `filter`
 - `hitch` / `partial` (we get `bind()`!)
 - `declare` / `delegate` / `mixin` / `extend`
- Design Philosophy
 - Defense: Namespaces / Globals
 - Offense: Forward Thinking APIs

Forward Thinking

```
// Defer to native trim if available
dojo.trim = String.prototype.trim ?
    function(str){ return str.trim() } :
    function(str){ /* slightly longer regexp version */ }

// Mimic Mozilla Array methods:
dojo.forEach = function(array, callback, scope){ ... }
dojo.map = function(array, callback, scope){ ... }
dojo.filter = function(array, callback, scope){ ... }
```

DojoType (the project)

```
// put Dojo Array methods on all Array's
dojo._clobber(Array.prototype, {
  forEach: function(callback, scope){
    dojo.forEach(this, callback, scope);
    return this;
  },
  map: function(callback, scope){
    return dojo.map(this, callback, scope);
  }
});

// use the new 'native' functions:
[1,2,3,4,5].map(function(i){ return i % 2 === 0 })
  .forEach(function(val){ /* do something */ });
```

Base at a glance

Events, Ajax, FX, DOM

- `dojo.connect(node, "onclick", function(){ });`
- `dojo.connect(obj, "custom", obj, "sync");`
- `dojo.xhrPost({ form:"login", load:function(data){ ... } });`
- `dojo.xhrGet({ url:"foo.txt", load:function(data){ ... } });`
- `dojo.anim(node, { width:200 });`
- `dojo.fadeIn({ node: node }).play();`
- `dojo.style(n, "height", "50px");`
- `dojo.place("<p>Hi</p>", dojo.body());`

CSS Selectors

- `dojo.query("ul > li").addClass("listy");`
- `dojo.query("a").onclick(function(){ });`
- `dojo.query("tr td + td").forEach(function(n){ });`
- `dojo.query(".someClass").map(function(n){ .. });`
- `dojo.NodeList.prototype / dojo.extend`

Basic Patterns

Magic Arguments

```
// function signatures with defaults
my.func = function(args){
  var opts = dojo.mixin({
    prop:"foo"
  }, args || {});
  console.log(opts.prop);
}

my.func(); // "foo"
my.func({ prop:"bar" }); // "bar"
```

DOM Arguments

```
var n = document.getElementById("someId");  
n.style.width = "200px";  
  
// pattern: dojo.byId  
var n = dojo.byId("someId")  
// pick:  
dojo.style(n, "width", "200px");  
dojo.style("someId", "width", "200px");  
dojo.query("#someId").style("width", "200px");
```

DOM Arguments

```
// Accept a String ID or DomNode Reference
my.func = function(node, args){
  node = dojo.byId(node);
  var opts = dojo.mixin({
    prop:"foo"
  }, args||{});
  console.log(opts.prop);
}
```

```
my.func("someId"); // "foo"
my.func(nodeRef, { prop:"bar" }); // "bar"
```

Ambiguous Constructors (poj)

```
some.Thing = function(args, node){
    dojo.mixin(this, args);
}
dojo.extend(some.Thing, {
    opt: "a-default",
    method: function(){
        console.log(this.opt);
    }
});
```

```
var a = new some.Thing(), b = new some.Thing({ opt: "x" });
a.opt == "a-default"
b.opt == "x"
```

Ambiguous Constructors (declare)

```
// allows for simulated inheritance
dojo.declare("some.Thing", null, {
    opt: "a-default",
    constructor: function(args, node){
        dojo.mixin(this, args);
    }
});
```

```
var a = new some.Thing(), b = new some.Thing({ opt: "x" });
a.opt == "a-default"
b.opt == "x"
```

Ambiguous Constructors

```
// uses the patterns:  
dojo.require("dojo.parser");
```

```
<!-- in html -->  
<div id="baz" dojoType="some.ClassThing" prop="value"></div>
```

```
// or without parsing - "poj"  
new some.ClassThing({ prop:"value" }, "baz");
```

```
// or from no DOM at all  
new some.ClassThing({}).placeAt("container");
```

DRY: Functional JS

```
my.turnIt = function(dir){  
    // if 1, go next. -1, go left.  
}  
  
var next = dojo.partial(my.turnIt, 1),  
    prev = dojo.partial(my.turnIt, -1);  
  
// later  
dojo.query(".nextbutton").onclick(next);
```

Dual Service Functions

```
my.func = function(node, args){
    node = dojo.byId(node); // Sting|DomNode
    /* do something to node */
}

dojo.extend(dojo.NodeList, {
    // now a plugin:
    func: dojo.NodeList._adaptAsForEach(my.func)
});

// run one, run all
my.func("someId", { opts:true });
dojo.query(".someNodes").func({ opts:true })
```

Chaining

```
// NodeList:  
dojo.query(".bar")  
    .addClass("baz")  
    .onclick(fn)  
    .place("#foo", "before")  
    .blah().blah().blah().blah(n).blah();  
  
// Elsewhere  
new dojox.gfx.Shape(surface)  
    .addFill("#edded").setStroke(...).connect(...);  
  
// really just "this"
```

\$ vs PlugD

- Dojo - `dojo.query(".class")` `dojo.byId("id")`
- jQuery - `$(".class")` `$("#id")`
- Prototype - `$$(".class")` `$("id")`
- MooTools - `$$(".class")` `$("id")`

\$ vs PlugD

```
dojo.conflict();  
$(document).ready(function(){  
    $("#bar").onclick(fn);  
});  
  
// or automatically:  
var djConfig = { conflict: true };  
  
# automatically via build:  
./build.sh autoConflict=on profile=plugd
```

Expansion Patterns

dojo.Deferred

- from Twisted/Python
- ASYNC Contract
- Chained Callbacks
- Scope-Aware

Indirect Usage

```
// plain xhr
dojo.xhrGet({
  url:"foo.html",
  load: function(data){
    /* handle response */
  }
});
```

```
// manipulating scope
dojo.xhrGet({
  url:"foo.html",
  error: dojo.hitch(otherScope, function(e){
    this.logError(e);
  })
});
```

Why embed?

```
// plain xhr
dojo.xhrGet({
  url:"foo.html",
  load: function(data){
    /* handle response */
    dojo.xhrPost({
      form:"bar",
      content: data,
      load:function(){
        // then update some ui, add another callback ...
        // "ugh"
      }
    })
  }
});
```

More 'Direct' Usage

```
var d = dojo.xhrGet({ url:"foo.html" })
    .addCallback(function(data){
        // can modify data along response chain
        return data.toLowerCase();
    })
    .addCallback(andPost) // a function that handles data
    .addErrback(otherScope, "errHandler");

// elsewhere:
d.addCallback(function(data){
    /* handle it, return nothing */
});
```

dojo.data

- More than just DOM
- API at the core
 - Read, Write, Identity, Notification
- Common Functions and Callbacks
- Direct communication
- RESTful

Store Example?

```
// load the store:
dojo.require("dojox.data.GoogleServiceStore");

// make the store:
var store = new dojox.data.GoogleSearchStore(...);

store.fetch({
    // the request:
    query:{ q:"Dojo" },
    // the "wiring"
    onItem: dojo.hitch(thinger, "addItem"),
    onComplete: dojo.hitch(thinger, "render")
});
```

	Stock Name	Symbol	Updated	Price	+/-	Change	Low	High	Open
	Anduct	ANDT	19:12:15	1.09	^	+1.03 (-94.51%)	0.00	3.13	3.13
	BAY Corporation	BAYC	19:12:15	8.35	^	+2.28 (-27.32%)	0.00	10.00	9.79
	Bagies Consulting	BGCN	19:12:15	0.95	^	+0.92 (-96.85%)	0.00	4.11	4.11
	Ations Europe	ATEU	19:12:15	0.80	^	+0.35 (-43.88%)	0.00	6.72	6.72
	Datio PLC	DTOA	19:12:15	6.44	v	2.65 (-41.05%)	0.00	10.00	2.11
	Corcor PLC	CRCR	19:12:15	7.96	^	+0.31 (-3.89%)	0.00	10.00	8.44

dojox.data Stores:

- AndOrReadStore
- AppStore
- AtomReadStore
- CouchDBRestStore
- CssRuleStore
- CsvStore
- FileStore
- FlickrRestStore / FlickrStore
- GoogleFeedStore
- GoogleSearchStore
- HtmlStore
- jsonPathStore
- jsonRestStore
- OpmlStore

Data Consumers:

Uni
United States of America

IMG_1432 (3 of 10)

IMG_1435 (3 of 10)

RPC / SMD

SMD

```
dojo.require("dojox.rpc.Service");

var goog = new dojox.rpc.Service("google.smd");

goog.websearch({ q:"Dojo" }).addCallback(function(response){
    // handle the responses
});

goog.booksearch({ q:"Dojo" }).addBoth(function(response){
    // Books about Dojo
});
```
